

EDIUS X

Software Version 10.34.9631 – Release Notes – December 2022

New Features

EDIUS

- Added NDI output feature (Workgroup only)

Prodedure

- 1) Select **Settings > User Settings > Preview > Monitor**
- 2) Tick **Enable NDI Output**
- 3) Click [Apply] then [OK]
- 4) From **View** menu, select **NDI Output** to be turned on
- 5) In NDI device, select the preview screen type (Recorder, Player or Multicam Source)
- 6) Preview screen will be surrounded with orange frame and NDI icon will appear during NDI output is turned on

** Due to limitations of the NDI SDK, the field order should be "Upper field" or "Progressive"*

** See EDIUSWorld.com [FAQ](#) for more details*

Mync

- **No additional/improved feature*

Fixed Issues

EDIUS

- Some dialogs and options are displayed in English even if the EDIUS UI is displayed in the OS language

Mync

**No fix provided*
